Bakery high combination case

Dry over refrigerated

MODEL GLEGVS/VD

Bakery high combination dry over refrigerated case, model GLEGVS/VD

General Information

Refcon Bakery high combination cases offer a unique display opportunity for bakery retailers to integrate both refrigerated and dry environments in an attractive and space-saving configuration.

The model GLEGVS/VD features two top shelves for dry display with the third shelf and bottom deck refrigerated. High dry over refrigerated combination cases are available in three and four-foot lengths.

The Refcon Legend profile gives you all the display volume you need in a contemporary case design that combines esthetics with the functionality.

The dry top section is open at the back for easy serving access. Mirrored rear doors enclosing the

refrigerated lower section and side walls amplify light and give you that "endless" look that helps create dynamic displays for your dry and refrigerated baked goods.

Refcon Bakery combination cases are attractive, quiet, and built from tough, easy-to-clean laminates and tempered glass. Standard 3500K interior lighting offers a bright, attention-getting display. Electronic temperature and defrost control and digital temperature display makes it easy to keep products cold while using energy efficiently.

Standard Features

- Tempered curved front glass
- Dry section:
 - (1) Adjustable glass shelf and (1) fixed shelf with light.
 - Lexan® ends.
 - Open back.
- Refrigerated section:
