WE SHOWCASE YOUR FOOD™

## FEEL LIKE A KID IN A CANDY STORE. LITERALLY.

As the old cliché goes, a candy store is a treasure trove of sights and smells for kids of all ages. Refcon™ designs candy cases that not only showcase sweets, but showcase your sweet design.

First of all, we will sit down with you to fully understand your design vision, which includes everything from environmental ambiance to space limitations. Then we offer customized and modified case options in a variety of sizes and finishes to meet your needs. In the end, we'll deliver the eye candy as you see it.

Each case will satisfy the space requirements and the long-term operational requirements as well. Every Refcon candy case is built with integrated tubular frame structure. This ultra-rugged construction delivers years of trouble-free operation. And if that weren't already enough, we also offer a lifetime warranty on our frames and doors. There's no need to worry about repeated opening and closing (and slamming) that comes along with everyday use.

Kids and adults can't help but put their faces up to the large glass profiles as they eye every delicious treat.

Our exclusive Works-in-a-Drawer™ feature makes servicing your Refcon candy case a breeze. The refrigeration system slides out with a simple pull, which makes for faster repairs and less disruption to business.

All of our candy cases feature one-way mirrored sliding doors to enhance presentation and maximize sales.

## “SHELF-LIFE” HAS NEVER TASTED SO GOOD.

From fudge to truffles, candy and confections require precision temperature and humidity controls. Refcon's candy cases maintain a consistent temperature of 60° F, which is the recommended temperature for all types of candies. Additionally, our units keep the relative humidity at a steady 50%, which helps keep candy fresher longer.
