Salad bar single-side custom

MODEL **GPRED**

Custom single-sided salad bar
Model GPRED.

General Information

Refcon single-sided salad bars are designed to keep chilled foods appetizing and to complement or enhance the décor of your foodservice establishment.

Superior materials, design and workmanship in these custom salad

bars are the result of Refcon's unmatched experience building refrigerated and heated cases for practically any food display environment.

The single sided design features an angled display for easier customer access and better presentation. Tempered glass sneeze guards are designed with fewer structural members for a "lighter" unobtrusive look that focuses on the food. Tough tubular framing along with stainless steel interior surfaces and superstructure are standard. Bar lengths, ends and corners are custom-designed to your layout specifications.

But that's only the beginning. Refcon offers a wide range of countertop materials with custom cutouts, heated food and soup wells, and elegant under-ledge lighting that can make your salad bar the star of your customers' dining experience.

Standard Features

- Angled well design.
- Stainless steel superstructure.
- Stainless steel interior.
- Forced air over/under refrigeration.
- Tempered glass sneeze guard.
